#### PREFACE TO SECOND EDITION

THE rapid sale of the first edition has led to the issue of a second edition. The object of the book is to put on record really useful practical prescriptions of bazaar medicines and this character in the new edition has been maintained. A few new prescriptions have been added.

I know no better treatment for Influenza than the prescription on p. 44 or better digestive powder than on p. 135. If any practitioner can suggest any useful prescription of bazaar medicines which he thinks would add to the utility of the book I will be glad to consider their addition to the present useful list.

1924.

G. T. BIRDWOOD

#### PREFACE TO FIRST EDITION

This, small book on Bazaar Medicines is written with the hope that it may be useful to medical men working in Indian districts, as those in medical charge of Branch District Dispensaries. Mission Dispensaries and those in private practice far away from chemist shops.

It is of a very simple and practical nature and puts forward a number of definite prescriptions which can be made up from bazaar medicines.

During the war, when many European drugs were difficult to get and were very costly, one recently qualified medical man in charge of a Branch Dispensary told me he could not carry on his practice and dispensary without more European drugs. This showed a want of practical knowledge of bazaar medicines and led me to compile this little book.

The brief list of bazaar medicines, according to their actions given on pages vii—xvii, will show what a large range of practical therapeutics bazaar medicines cover. If a medical man has a good knowledge of these, he can treat many minor maladies and relieve much suffering at a very little cost.

It must be remembered that a great many of the maladies of everyday life, for which doctors are consulted and for which people come as out-patients to dispensaries, are of a minor nature, as coughs, colds, indigestion, ulcers, sore eyes, sore throats, worms. Bazaar medicines intelligently used have a sufficiently practical and wide enough range to meet most of these maladies.

There is no question that bazaar medicines are much cheaper. A bottle of European medicine costs As. 8 to Rs. 2, while a bazaar medicine costs a few pice. District Board Dispensaries can give a vast amount of medical relief at very little cost if bazaar medicines are intelligently and

largely used. Even in such epidemics as influenza, plague, cholera and relapsing fever, bazaar drugs can give much relief.

At the big medical schools, attached to our big hospitals, in the course on Materia Medica, Indian plants and drugs receive attention, but in the wards of the big hospitals, which institutions have an ample supply of European drugs, bazaar medicines are practically never prescribed, so that men leave the medical schools with little practical knowledge of prescribing bazaar medicines.

Also the books on Indian medicinal plants and drugs as Nadkarni, Khory and Mooden Sherrif, interesting and useful as they are, give a vast amount of detail and describe many drugs which are practically never used. Nadkarni describes 419 drugs. Many are of great value, many have very slight therapeutic value. The majority are of no practical value to the medical practitioner. Big manufacturing and pharmaceutical chemists are needed in India, who can make

and standardize preparations and put them on the market.

It is hoped this little book, by being very brief and putting up definite prescriptions of bazaar drugs, may be of help to practitioners. It is interleaved with blank pages, so that practitioners can add useful prescriptions of their own to those already given.

## Practical Bazaar Medicines

#### AJOWAN-OMUM SEEDS-CARUM.

The seeds of Carum and Ptychotis Ajowan.

A very good digestive, an aromatic, pungent, stimulant, digestive and antispasmodic.

Four preparations are available in the bazaar,-

- (1) The seeds. Known as Ajowan bij.
- (2) Ajowan-ki-phul. A crystalline substance.
- (3) Ajowan-ki-tel. A distilled oil.
- (4) Ajowan-ki-arrack. Omum water.

A substance identical to thymol can be got from the oil.

B. Ajowan seeds
Rock salt (Sendha
nimal:)
Asafætida (Hing)
Chubelic myrobalans
(Har, chhoti)

equal parts—1 dram.

Dose:—10 grains after food.

For dyspepsia and colic.

R Ajowan seeds . 3 lb., in a cloth bag. Water . . 6 quarts. Distil in a small still for 4 or 5 hours. This is Omum water. Dose :- 1 ounce. For spasmodic colic, flatulency, dwarrhea and vomiting of cholera and cholera. . 2 minims. R Ajowan-ki-tel Mucilage . .  $\frac{1}{2}$  dram. Water . . . ounce. For flatulent colic. . I ounce. R Omum water . . . I ounce. Lame water Tinet. opii. . . 5 minims. For diarrhoea. Ferri sulph. (Kasis) . 1 grain. R Omum water (Ajowan-ki-Arrak) . . 1 ounce. Infus, chiretta . . I ounce. Twice daily. A good tonic. Ajowan seeds (powdered) \(\frac{1}{2}\) dram.  $\mathbf{R}$ Cardamom (powdered) 1 dram. Black pepper (powdered) & dram. Ginger (powdered) . 1 dram.

Dose:—1 dram twice daily. Carminative and for colic.

#### ALOES-MUSABAR.

The dried and inspissated juice from the leaves of Aloes socotrina or the Indian bazaar varieties—Aloes indica or Aloes literalis.

The Indian bazaar varieties need to be purified by boiling in water, allowing to stand for twelve hours, then straining, then mixing the liquors, and set aside in an open vossel till evaporated to dryness.

A good purgative; not suitable for pregnancy or piles or children.

R. Aloes (Mvsabar) . . . 24 grains.
 Sulphate of iron (Kasis) . 24 grains.
 Cinnamon (Dalchini) . 60 grains.
 Honey, q.s. for making pill mass.

Divide into 24 pills.

Dose:—1 or 2 pills.

For constipation.

Aloes (Musabar) . . . 20 grains.
 Asafœtida (Hing) . . . 20 grains.
 Honey, q.s. flat pill mass.

Divide into 12 pills.

Dose:—1 pill twice daily.

For hysterical fits and flatulency.

R Aloes (Musabar) . . . 18 grains. Sulphate of iron (Kasis). 30 grains. Honey, q.s. for a pill mass.

Divide into 24 pills.

Dose:—1 pill three times a day and gradually diminish.

For constipation.

#### ALUM-PHITKARI.

A valuable medicine, obtainable in all bazaars. Indian alum occurs as transparent crystals, darker than imported alum due to a trace of iron. It is a good astringent. Useful locally for diseases of the skin, eyes, nose, gentals, rectum. Internally for hæmorrhage, diarrhæa, whooping cough and asthma.

R Aluminis (Phithari) . . . 3 grams.

Water . . . 1 ounce.

A lotion for sore eyes.

An injection for gleet.

B. Alum (Phithari) . . 2 drams.
Decoction galls . . 1 pint.
Local application for piles.
For prolapse of anus.
Injection for vaginitis and leucorrhæa.

 $\begin{array}{ccc} \text{R. Alum} & \text{(powdered)} \\ & \text{Catechu} & \text{(powdered)} \\ & \text{Cinnamon (powdered)} \end{array} \begin{array}{c} \text{equal parts-} \\ & \text{5 grains.} \\ A \ powder \ for \ diarrhea. \end{array}$ 

B. Alum (Phitkari) . . 10 grains.
Tinct. opii. . . . 7 drops.
Water . . . 1 ounce.

For hæmorrhage from stomach and lungs.

B. Alum.

R	Alum (Phitkarı)			2	drams
/-	Milk				
Boil fe	or 10 minutes and str				*
	-2 ounces every				,
For he	emorrhage, albuminus	ra a	nd d	lıab	etes.
B <sub>k</sub>	Aluminis (Phitkarı)			5	grains
	Aqua rosæ .			1	ounce
Twice	daily for asthma a	nd c	ougī	'n.	
B.	Aluminis (Phitkari)			2	drams
	Sugar			2	drams
	Decoction galls			1	pint.
Gargle	for tonsilitis and s	pongy	gu	ms.	
B.	Aluminis (Phitkari)			20	grains
	Water .	,		1	ounce
For se	ores on penis.				
B,	Aluminis (Phitkari)			1	dram.
	Boracis (Sohaga)	-		]	dram.
	Water			10	ounce

#### AMMONIUM CHLORIDE—NAUSADER.

An impure variety can be obtained in most bazaars. It can be purified and made into a pure powder by dissolving in hot water and evaporating to dryness, and then bottling.

It has the same therapeutic action as the drug of the British Pharmacopœia.

It is a good expectorant and is useful in pharyngitis, laryngitis and bronchitis. It is also good as an inhalant. It increases the secretion. It is also of use in gastric catarrh and want of action of the liver. It promotes bile. It also relieves the pair of migraine and sciatica.

R. Ammon. chlor. (Nausader) 1 dram. Heated on a dish.

For an inhalation in laryngitis.

B. Ammon. chlor. (Nausader) 20 grains.
Infus. sarsaparilla . . 1 ounce.
For want of action of liver.
For chronic rheumatism.

R. Ammon. chlor. (Nausader) 15 grains.

Aqua camph. (Kapur pani) 1 ounce.

For neuralgia and headache.

R Ammon. chlor. (Nausader) 10 grains. Ext. glycyrrhize liq. . 20 minims Aqua ad. . . 1' ounce.

For bronchitis.

Ammon. chlor. (Nausader) 2 drams. Hot water . . . 1 pint. A fomentation for glands, joints and boils.

### ANISEED-ANISE FRUIT-SONF.

The dried fruit of Pimpinella anisum. A good aromatic stimulant, and carminative obtainable in all bazaars.

R Aniseed (Souf) . . 2 drains.

Water . . . 2 pints.

Distil to 1 pint.

Dose:—1 ounce t.d.s.

An antispasmodic.

н аныграятовы.

B. Amseed (Sont) . . \frac{1}{2} \text{drain.}

Myrobalans (Har) . . 1 \text{dram.}

Sugar . . . 1 \text{dram.}

4 \text{larative powder.}

R. Aniseed (Souf) . .  $\frac{1}{2}$  ounce. Caraway (Jira) . .  $\frac{1}{2}$  ounce.

Dose:—1 teaspoonful after meals, as a digestive.

#### ARUSHA-VASAKA-ADHATODA.

The root and the leaves of Adhatoda vasica. A good expectorant and antispasmodic for bronchitis, asthma and whooping cough.

	Fresh juice of Arusha Honey —1 to 2 teaspoonf ugh.			
R	Arusha leaves (dried Boiling water	•		
Add	•		30	-
	—1 ounce t.d.s. ronic bronchitis and	asthnic	τ.	
B,	Arusha root powder. Gilo powder (See pag Water	e 62)	4	drams.
	ecoction. —1 ounce t.d.s. rchitis.			

B. Arusha leaves (dried).

Make viyarettes for asthma.

Official preparations:

Tinet. Adhatoda or Tinet. Vasaka are also useful.

#### ASAFŒTIDA-HING.

A gum-resin obtained from root of Ferula feetida. A good antispasmodic and stimulant used in flatulent distension, hysteria and cholera. It can be obtained in most bazaars. The strongly smelling kind is best.

	R	Asafætida ( $Hing$ ) .		1	grain.
		Pepper (Mirch) .		1	grain.
		Opium (Afim)		$\frac{1}{4}$	grain.
		Camphor (Kapur) .		1	grain.
4	pill	in diarrhæa and choler	u.		

R Asafætida (*Hing*) . . . 20 grains. Aloes (*Musabar*) . . . 20 grains. Honey, q.s. to make 12 pills.

# Dose:—1 pill twice daily.

For flatulency and hysteria.

R. Asafætida . . . 30 grains.

Water or thin gruel . . 6 ounces.

An enema in flatulent colic.

R Asafætida . . . 5 grains.
Soap, q.s. for 1 pill. t.d.s.
For nervousness.

B. Asatœtida . . . 4 drams.
Boiling water . . . 1 pint.

Rub down, strain and cool.

Dose: —1 tablespoonful t.d.s.

For hysteria and flatulency.

B. Asafætida (Hing)
Ginger (Sonth)
Black pepper (Kala mirch)
Long pepper (Pipul)
Ajowan seeds (Ajonan)
Cummin seeds (Jira)
Rock salt (Sendha mimak)

Dose: -10 to 20 grains, as a digestive.

Rock salt
Cardamom
Ginger

Cardamom
Ginger

· For flatulency of children.

R. Asafœtida (*Hing*)
Ajowan (*Ajowan*)
Rock salt (*Sendha nimak*)
Chubelic myrobalans (*Har*)

Rasafœtida (*Hing*)
equal parts
—2 drams.

Dose:—10 grains. For colic pain.

#### ASOKA BARK.

The bark of Saraca indica. It is a strong astringent. Chiefly used to check uterine hæmorrhage and hæmorrhage of piles.

R	Asoka bark		. 4	ounces.
	Milk .		. 4	drams.
	Water .		. 16	ounces.

Boil to a quarter and strain. It must be made fresh every day.

Dose:—1 ounce t.d.s.

A tincture is also made.

The pounded flowers are sometimes used.

#### ATIS.

The root of Aconite heterophyllum. A valuable tonic after malarial fever, a good febrifuge, good bitter tonic. It is a small tuberous root about 1 inch long, wrinkled, grey in colour. It should be white on breaking across.

R Atis radix (powdered) . 30 grains.

Dose:—1 powder three times a day during fever.

R Atis powder . . . 5 grains.

Sugar . . . 10 grains.

Dose:—1 powder t.d.s. as a tonic.

B. Atis powder (Atis) . . . 4 drams.
Ginger (Soñth) . . . 4 drams.
Kurchi (Kurchi) . . . 4 drams.
Root of Tinospera (Gulancha) 4 drams.
Water . . . . . 1 pint.

Boil down to a quarter.

Dose:—1 to 2 ounces, as a tonic, t.d.s.

R Atis (Atis)
Kaladana (Kaladana)
Black pepper (Kala mirch)
Ginger (Soñth)
equal parts -10 grains.

Dose: —5 grains twice daily.

A laxative and tonic.

# BABERANG-EMBELIA RIBES.

The truit of Embelia ribes and Embelia robusta. Small globular seeds, obtainable in bazaars. A good anthelmic for tape-worin.

B. Baberang powder . . 1 dram.
Sugar . . . 1 dram.
One dose on an empty stomach for tupe-worm.

# BABUL GOND-GUM BABUL.

Babul-ki-chhal- Indian Gum Arabic.

The bark of Acacia arabica. A mild astringent. denerally used locally, but a decoction also can be nade. Contains tannin.

R Babul bark (bruised) . 2 ounces.
Water . . . 1 pint.
Boil for 10 minutes and strain. (Decoction.)
A good application for protruding piles, prolapse
of rectum; a gargle for spongy gums, and a lotion
for lencorrhad and gonorrhad.

#### BACH OR ACORUS ROOT.

The root of Acorus calamus. A thick flat spongy root with aromatic odour and bitter taste A good bitter tonic and stomachic.

Acorus root (Bach), bruised 1 ounce.

# GROUND-NUT OIL—(MONKEY-NUTS) MUNGPHALI TEL.

Made from fruit of Arachis hypogæa. obtainable in all bazaars. The nuts are very nutritive, having starch 37% and oil 11%, albuminous matter 31%. Owing to their richness, they cause biliousness if taken in excess. The ground-nut oil (Arachis oleum) is a very good substitute for olive oil for all liniments and preparations. It is about one-fourth the price and so good for district work. It is a mild aperient.

## GULANCHA-TINOSPORA CORDIFOLIA.

The dried stems collected during the hot season, obtainable in most bazaars. A good, bitter tonic, diuretic and alterative and antiperiodic. Good substitute for Calumba.

R Gulancha (bruised) . . 1 ounce.

Water, cold . . . ½ pint.

Macerate for 3 hours and strain.

Dose:—1 ounce t.d.s. as a tonic.

For dyspepsia after fevers.

R Gulancha (Gulancha) . 1 dram.
Chiretta (Chiretta) . 1 dram.
Gingei (Soñth) . 1 dram.
Water . . . 1 pint.

Boil down to half.

Dose: -1 ounce after fever as a tonic.

R Gulancha (Gulancha) . 1 dram.
Cloves (Long) . . . 1 dram.
Cinnamon (Dalchini) . 1 dram.
Water . . . 1 pint.

Boil down to half.

Dose: -1 ounce t.d.s.

For dyspepsia.

GILA-KA-SAT or SAT-GILO is a white powder sold in the bazaar, obtained by powdering the stem and extracting the starch with water; said to be a good tonic and bladder sedative.

Dose: -1 dram with milk and sugar.

#### ISAPHGUL.

The seeds of Plumbago ovata. They yield a demulcent and astringent infusion on soaking in water. A good demulcent, of great use in dysentery and diarrhea and cystitis.

R Isaphgul seeds . . . 2 drams.
Water (cold) . . . 8 ounces.
Infuse all night.

Dose:—2 teaspoonfuls of the swollen seeds t.d.s.

For dysentery and cystitis.

R Isaphgul seeds (powdered). I dram.
Aniseed (Sonf) . . . 30 grains.
Sugar . . . . 30 grains.

For one powder.

Dose: —Take 1 powder t.d.s.

For dysentery.

R Isaphgul seeds (powdered). 1 dram. Indrajat (Kurchi seeds) . 5 grains.

Dose: -1 powder.

For dysentery.

R	Isaphgul seeds	(pow	dered	).	1	dram.
	Pot. nit				10	grains.
	Cubebs .		•		15	grains.
Dose	:-1 powder l	o.d.s.				
For go	norrhæa.					
R	Isaphgul seeds	(bruis	sed)		2	drams.
						pint.
Boil fo	r 10 minutes.					•

Dose: -2 ounces t.d.s.

For cystitis.

"Isaphgul-ka-chilka" is the mucilaginous shells of the seeds and can be bought in the bazaar.

Dose:—1 teaspoonful in 2 ounces of warm water.

# JANGLI PIKVAN—VOMITING SWALLOW WORT—ANANTAMUL (Bengali).

The leaves and root of Tylophora asthmatica A good emetic and expectorant, a substitute for Ipecac in dysentery. The leaves are more efficacious than root.

$\mathbf{R}$	Jangh pikvan	leave	s (por	X'-		
	dered).				10	grains.
•	Pulv. opii.				1	grain.
	Mucilage				1	dram.
	Aqua .				1	ounce.

Dose:—1 ounce t.d.s. For dysentery and diarrhæa.

B. Jangli pikvan leaves . 5 grains.
Syrup liquorice . . 30 drops.
Water . . . 4 drams.

## Dose: $-\frac{1}{2}$ ounce t.d.s.

For bronchitis and whooping cough.

R Jangli pikvan leaves . 40 grains.

For an emetic.

## JATAMANSI—BALCHIR—INDIAN SPIKENARD.

Root of Nardostachys jatamansi. It is obtain able in all bazaars. A good antispasmodic and nervous tonic for hysteria, chorea, convulsions and epilepsy. It is also a good digestive and carminative.

R. Jatamansi (powdered) . 20 grains. Camphor (*Kapur*) . . 3 grains. Cinnamon (*Dalchini*) . 5 grains.

Dose:—1 powder b.d.s.

For epilepsy and hysteria.

B. Jatamansi (bruised) . 5 ounces. Proof spirit . . . 1 pint.

Make a tincture.

Dose:—1 teaspoonful with 10 grains Pot. brom. and 10 drops Tinet. valerian.

For hysteria.

B. Jatamansi (bruised) . . . 2 drams. Boiling water . . . 10 ounces.

Make an infusion.

Dose: -1 ounce t.d.s.

For hysteria, nervousness and convulsions.

## KALADANA.

Dried seeds of Ipomœa hedercea, obtainable in all bazaars. A good laxative and purgative.

B. Kaladana seeds (powdered) 1 ounce.
 Rock salt (Sendha nimak) 1 ounce.
 Ginger (Soñth) . . 1 dram.

Dose:—1 teaspoonful t.d.s.

As a purgative.

B. Kaladana (powdered) . 20 grains.
 Black pepper (Kala mirch) 5 grains.
 Atis (Atis) . . . . 15 grains.

Dose: -1 powder.

For feverish attack, twice daily.

## KAKMARI-COCCULUS INDICUS SEEDS.

The seeds of Anamirta cocculus. They are very poisonous berries, obtainable in most bazaars. They are the source of Picrotoxin. Internally they strongly irritate the nervous system, causing violent spasm. Should only be used externally and even then not on abraided surfaces.

- B. Kakmari seeds . . . 10 grains. Ung. simplex . . . 1 ounce. For pediculi.
- B. Expressed oil of kakmari
  seeds . . . . 1 dram.
  Cocoanut oil . . . 1 ounce.
  For pediculi.

### KAMALA.

Powdered capsules of Mallotus philippinensis. A red powder, obtainable in all bazaars. Useful for a remedy for tape-worm and chronic skin disease and ring-worm.

R Kamala powder Honey, q.s. for one dose. For tape-worm, repeat in a week.

R Kamala (powdered) Baberang seeds (powdered) | equal parts. Rock salt (Sendha nimak)

Dose: -1 teaspoonful in milk. For tape-worm.

Kamala . R Sweet oil

Boil. Apply morning and evening. For ring-worm.

## KAKRA SINGHI.

Gall-like excrescences found on Pistacia integerrima and on Rheus succedanea. Much used by Indian physicians. An expectorant and demulcent.

$\mathbf{B}_{\!\scriptscriptstyle{\mathbf{k}}}$	Kakra Singhi (powdered)	15	grains.
	Ginger ( $So\tilde{n}th$ ).	5	grains.
		5	grains.

Dose:—1 powder t.d.s. For cough and influenza.

Ŗ	Kakra	Singhi	•	•	5	grains.
	Atis				5	grains.
	Pipul				õ	grains.
	Honey				1	dram.

A linctus for children.

## KOKUM-KI-TEL.

Expressed from seeds of Garcinia purpura. It is a concrete oil, solid when cold. Chiefly composed of tristearin. It is difficult to obtain. It is a very good application to ulcers and cuts. It is applied when warm and fluid, it then solidifies over the ulcer. It is soothing and protective.

## KURCHI (BARK) AND INDRAJAB (SEEDS).

The bark and seeds of Wrightea antidysenterica, obtainable in most bazaars. A specific for dysentery.

R. Kurchi bark (bruised) . ! ounce. Water, boiling . . ! pint.

Infuse for 6 hours and strain.

Dose: -1 ounce t.d.s.

For chronic dysentery.

R Indrajab seeds (powdered) 5 grains. Taken twice daily with Bael decoction.

For dysentery.

Solid and liquid extracts are now made and can be bought from chemists, which are of good value.

# LALCHITA—ROSE-COLOURED LEAD WORT RAKTO-CHITA (Bengali).

The root of Plumbago rosea, common in Indian gardens. A powerful painful vesicant.

B. Lalchita (fresh bark of root) 4 drams.
Rice flour . . . 1 ounce.
Water, q.s. to make a paste.

Spread on cloth, apply to skin for 10 to 20 minutes. Then apply a poultice for 6 hours, to make a blister.

## LEMON GRASS OIL-GANDHA-BENA TEL.

Also known as Indian oil of Verbena, though it only resembles Verbena. It is the oil distilled from Andropogon citratis and is obtainable in all bazaars. A good rubefacient liniment. Internally a stimulant and carminative. Useful in vomiting and cholera.

B.	Gandha-bena tel		5	drops.
	Mucilage .		30	drops.
	Aqua cinnamon	a	4	drams.
For	flatulent colic and	vomiting.		

R. Gandha-bena tel . . 5 drops. On sugar.

For vomiting.

R. Gandha-bena tel . . 4 ounces.

Sweet oil . . . 4 ounces.

A liniment. Apply locally.

For lumbago and rheumatism.

## LIME-SLAKED LIME-CHUNA.

Freshly prepared by interaction of water and calcium oxide (unslaked lime). Sedative and astringent, antacid.

B. Slaked lime . . . 1 ounce. Water . . . 4 pints.

Shake well in a stoppered bottle and allow to stand for 12 hours.

## Use as lime water:

To prevent curdling of milk.

For diluting milk.

For acidity and heart burn, pyrosis.

For vomiting.

Shake and allow to stand.

## Dose: -20 drops.

For antacid in childhood, with milk or before food.

B. Lime water equal parts—
Aqua 4 ounces.

For pruritus valve or vaginal injection and cracked nupples.

R	Calomel (Hydr	rarg l	Subci	hlor)	30	grains.
	Lime water				_	pint.
Blace	k wash for foul s	sores	and	garg	gle.	•
Ŗ	Lime water				$_2$	ounces.
	Sweet oil	•		-		ounces.

	0			•			drams.
			er .	•	•	1	pint.
$A \ cool$	ing dri	nk.					

B. Fresh lime juice.

Apply locally for mosquito bites.

## LINSEED-ULSI.

The seeds of Linum usitatissimum. The seeds yield a rich oil on pressure. On soaking in water they give a viscid mucilaginous jelly-like mass. A good demulcent.

LINSEED TEA. As a demulcent in colds, cough, dysentery and cystitis. Take 1 ounce linseed, clean it by picking out all other seeds. Boil in 1 pint of water for 5 to 10 minutes and strain. Add sugar.

Dose:  $-\frac{1}{2}$  pint twice daily.

For dysentery, cough and cystitis.

LINSEFD POULTICE. Take a basin and warm it. Add boiling water 6 to 8 ounces, sprinkle linseed on the water and stir; add till the mixture is like thick porridge or suji. Press and mash the mixture against the side of the basin while hot. Pour the mixture on to a piece of cloth, spread with spatula making it  $\frac{1}{4}$  inch thick. Smear surface with oil.

Apply to the chest while hot.

R Lime water . . . 2 ounces.
Linseed oil . . . 2 ounces.
For application to burns.

## LIQUORICE-MULATHI.

The root of Glycyrrhize glabra. It is not indigenous to India, but is obtainable in all bazaars. The root of Abrus precatorious is often sold in its stead. It is demulcent and expectorant.

B. Liquorice root . . 2 ounces.

Bhindi capsules . . 1 ounce.

Water . . . 1 pint.

Boil for half an hour and strain. Add sugar 8 ounces, boil down to a syrup.

Dose: —1 to 4 teaspoonfuls.

For troublesome cough.

B. Liquorice (Mulathi) equal parts— Camphor (Kapur) 1 dram for a pill mass. Gum Babul  $(Gond \ Babul)$ 

Dose:—5 grains for a pill. For in fluenza and cough.

#### MANGOSTIN.

The fruit of Garcinia mangostana. Largely imported into Indian bazaars. A good astringent and antidysenteric. The rind and the whole fruit is used medicinally. It contains tanning.

R. Mangostin rind . . . 2 ounces. Water . . . 1 pint.

Boil for half an hour and strain. Make a decoction. Add syrup 4 drams.

Dose: -1 ounce t.d.s.

For dysentery.

B. Mangostin fruit (dried and powdered) . . . 10 grains. Cinnamon powder (Dalchini) 5 grains. Cardamom (Ilachi . . 10 grains.

Dose: -1 powder t.d.s.

For dysentery.

R. Mangostin powder . 10 grains.
Cubebs (Kababchini) . 10 grains.
Alum (Phitkari) . 10 grains.
Gum acacia (Gond) . 10 grains.

A sedative powder for gonorrhaea.

# MUDAR (Hindi); AKANDA (Bengali).

The dried root-bark of Calotropis procera and Calotropis gigantea, free from outer corky layers. It should be gathered in April and May from plants grown in sandy soil and dried without the sun, before peeling off the bark.

A good tonic, alterative, expectorant. In big doses emetic and gastro-intestinal irritant, a substitute for Ipecacuanha.

R. Mudar (powdered) . . 4 grains.
 Ginger (Soñth) . . 1 grains.

Dose :- Powder t.d.s.

As a tonic and expectorant.

Also said to be good for leprosy.

B. Mudar powder . 20 grains.

A good emetic or given for dysentery with a previous dose of tinct. opii. and on empty stomach and mustard plaster to epigastrium.

#### MUSK-KASTURI.

The pod of secretion from preputial follicles of musk-deer, obtainable in bazaars of Northern India.

A stimulant in low fevers and debility and chronic coughs. Combined with other stimulants and antispasmodics.

B. Nutmeg (
$$Jaiphal$$
)
 Mace ( $Jaipatri$ )

 Long pepper ( $Pepul$ )
 equal parts

 Black pepper ( $Kala\ mirch$ )
 —in pill.

 Musk ( $Kasturi$ )

Dose: -2 grains.

B. Musk (Kasturi)
Cardamom (Hachi) equal parts—
Clove (Long) 5 grains.
Date (Khurma)
Honey . . . . 1 ounce.

Dose: -One teaspoonful.

For a stimulant and a remedy for hoarseness.

B. Musk (Kasturi) . . 1 grain.
Camphor (Kapur) . . 3 grains.
In a pill for depression.

#### MUSTARD-RAI.

The prepared commercial mustard can be bought in most bazaars; also the expressed oil from seeds.

R. Mustard (Rai) (prepared) 1 ounce. Water . . . 8 ounces.

Dose:—This draught for an emetic. Useful in narcotic poisoning.

R. Mustard (prepared) . .  $\frac{1}{2}$  ounce. Flour or Linseed meal . 8 ounces.

Add boiling water and stir to form a poultice. (See Linseed poultice) a most efficient application in Pleurisy, Pneumonia, Hepatitis and Rheumatism.

B. Mustard (prepared) . . 10 ounces. Hot water in bath . . 10 gallons. (40 seers)

Place the feet or whole body in bath; a warm mustard bath is most stimulating.

B. Oil of mustard (Ran) . ½ dram.

Camphor (Kapur) . 1 dram.

astor oil . . 2 drams.

Alcohol . . 2 ounces.

 $A\ good\ stimulating\ liniment.$ 

## MYROBALANS (BELERICA)—BAHERA.

The dried fruit pulp without stones of Terminalia belerica, obtainable in all bazaars. Astringent and laxative, used also for loosening coughs and hoarseness.

$\mathbf{R}$	Bahera		٠,	
	Sendha nimak.			equal parts
	Pipul			$-\frac{1}{2}$ ounce.
	Kala mirch .		.)	
	Honey, q.s. for a	linetus.		
	. 4 duam			

Dose: -1 dram.

For cough.

$\mathbf{R}$	Bahera		•	• }	
	Anwala			1	
	Har				equal parts
	Pipul			. [	-2 drams.
	Black sa	lt		.	
	Sugar	•		.)	

Dose:  $-\frac{1}{2}$  to 1 dram.

As a digestive.

## MYROBALANS (EMBELIC) - ANWALA-AWLA.

The fresh and dried fruit of Phyllanthus emblica. The fresh fruit is diuretic and laxative and a good cooling sherbut may be made from it. The dried fruit is astringent and useful in diarrhoea and dysentery.

В.	Anwala	(juice	of	fresh	fruit)	3	drams.
	Sugar					3	drams.
	Water					10	ounces.
For a	sherbut,	diuret	ic	and	larativ	e.

B.	Pulv. myrrl	ı .	•		3	grains.
	Pulv. rhei	•			3	grains.
	Kaladana	•			5	•
As a sto	machic.					

#### NIM BARK-NIM.

The dried bark of Melia azad dirachtæ. Though almost every part of the tree is used by Indian physicians medicinally, the bark is practically the only portion of any use. It is a good bitter tonic, astringent, antiperiodic.

- B. Nim bark powder (Nim) . ½ dram. Cinnamon powder (Dalchim) 5 grains. A tonic powder, b.d.s.
- B. Nim bark (bruised) . . . 2 ounces.

  Cloves (Long) . . . 10 grains.

  Boiling water . . . 1½ pint.

  Boil for 15 minutes.

Dose:—2 ounces.

As a tonic.

For loss of appetite and tonic.

Bruised nim leaves . 1 ounce. Rice flour . . . 1 ounce.

Tepid water to make a poultice.

For indolent ulcer and eczema.

## Official preparations—

- (1) Infusion azad dirachtæ indica 1 ounce.
- (2) Tincture azad dirachtæindica 1 to 1 dram.

#### NUTMEG-JAIPHAL.

The imported variety is the dried seeds of Myristica fragrans and is obtainable in all bazaars. The country nutmeg is the dried fruit of Myristica malaberica and is not so good. It is an aromatic and carminative.

$\mathbf{R}$	Jaiphal (powdered)			<b>5</b>	grains.
	Caraway (Jira) .		. 1	0	grains.
	Ginger (Sonth) .	•		5	grains.
carr	ninative before meals.				

The oil of nutmeg, which is used in perfumery, when mixed with sweet oil, makes a good liniment for chronic rheumatism.

A

## OPIUM (Affim).

Opium is obtainable in all Indian bazaars. It has the same therapeutic action as the drug of the British Pharmacopœia. The most valuable drug for the relief of pain. Dose  $\frac{1}{2}$  to 2 grains.

Poppyheads (the capsules of Papaver somniferum) are used extensively as a sedative fomentation and poultice. The poppyheads are bruised and boiled in water. A flannel is dipped into the hot fluid, wrung out and applied locally.

#### PAPAIYA TREE.

The milk juice of the fruit of Carica papaya. A strong digestive.

R. Milky juice of unripe fruit . 1 dram.
Sugar . . . . 1 dram.
Divide into 3 doses.

Dose:—One, three times a day.
For enlargement of spleen.

Rub on ring-worm once daily. Said to cure.

R. Fresh juice of unripe fruit when dried, forms a powder. Dry in the sun. Makes papain.

Dose: -10 grains.

For dyspepsia.

- R Papain . . . . 10 grains.
  Rhubarb radix (Revanchini) 5 grains.
  Cinnamon (Dalchini) . . 5 grains.
  As a digestive powder before meals.
  - R Fresh juice of unripe fruit .  $\frac{1}{2}$  ounce. Honey . . .  $\frac{1}{2}$  ounce. Boiling water . . . 2 ounces.

A draught for round-worm, followed by castor oil.

## PEPPER (BLACK)-KALA MIRCH.

The dried unripe fruit of Piper nigrum. It is obtainable in all bazaars. A good stimulant, stomachic and carminative. Locally a good counter-irritant.

B. Black pepper (Kala mirch) 2 grains.
Asafœtida (Hing) . . 1 grain.
Opum (Affim) . . . ½ grain.

For diarrhea,

B. Pepper (Kala mirch)
Ginger (Sonth)
Long pepper (Pipul)
Caraway (Jura)
Rock salt (Seudha nimak)

equal parts—
2 drams.

Dose:  $-\frac{1}{2}$  to 1 teaspoonful.

As a digestive after food.

B. Kala mirch . . . 2 drams.
Caraway powder (Jira) . 4 drams.
Honey . . . 4 ounces.

Rub well together.

Dose:  $-\frac{1}{4}$  to 1 teaspoonful.

As a digestive.

B. Kala mirch . . . 2 drams.
Boiling water . . . 1 pint.

As a good gargle when cold.

# PIPUL—PIPULI—PIPULI MULA LONG PEPPER.

The fruit, root and stems of Piper longum. Pipuli mula is applied to the roots and joints of stems—pipul to the catkins. A good stimulant, carminative and alterative, also an expectorant.

R	Long pepper (Pipul)	1	
	Ginger (Sonth)		
	Black pepper (Kala mirch)	equa	l parts—
	Cinnamon (Dalchini)	2	drams.
	Caraway (Jira)	,	

# Dose: $-\frac{1}{4}$ to 1 dram.

A good expectorant powder.

Ŗ.	Pipul		•		10	grains.
	Anwala				10	grains.
	Har	•			10	grains.
	Sendha r	imak			10	grains.

Dose: -1 powder after food.

Good digestive powder.

An infusion made of 10 peppers with honey makes a good expectorant.

# PITHORI—TURBAND—WHITE TURPETH ROOT.

The root and root-bark of Ipomœa turpethum. The black turpeth is not used. A strong purgative, well known in the bazaars.

₿.	Pithori (Turband)	. 30	grains.
	Ginger	. 10	grains.
	Cream of tartar	. 10	grains.
A stro	ng purgative.		

B. Pithori (Turband) . . . 40 grains.
Rock salt (Sendha nimak) . 10 grains.
Ginger (Sonth) . . . 10 grains.
Pepper (Kala mirch) . . . 5 grains.
Water, q.s. for a pulp.

A purgative.

## PLANTAIN-BANANAS-KELAH.

The fruit of Musa sapientum. Valuable in the treatment of sprue, diarrhœa and scurvy. It is not well digested by children.

B. One plantain fruit mashed.Milk . . . . 4 ounces.

Taken slowly with a teaspoon, one three times a day.

For dysentery and sprue.

Mash and mix well.

Take twice daily.

For dysentery and diarrhoea.

#### POMEGRANATE-ANAR.

"Anar-ki-chhal" or the root-bark and rind of fruit of Punica granatum, is obtainable in all bazaars. It is a valuable astringent, antidysenteric and anthelmic.

"Anar-ka-pani" is a popular cooling beverage made from juice of fresh fruit.

R Rind of Anar fruit (dried) . 2 ounces. Cloves (bruised) . . 2 drams. Water . . . 1 pint. Boil for 15 minutes and strain.

Dose: -1 ounce t.d.s.

For dysentery and diarrhoa.

Root-bark of pomegranate

(sliced) . . .  $^2$ ounces. . . . 2 pints. Water

Boil down to 1 pint.

Dose: -2 ounces fasting. Repeat every half an hour for 4 doses.

For tape-worm.

R Rind of Anar fruit . 1 ounce. Rind of fruit of mangostin 1 ounce. Kurchi bark . . 1 ounce.

> Water . . . . 1 pint.

A decoction for dysentery.

Dose: -1 ounce t.d.s.

# POTAS. NIT.—SALTPETRE—SHORA (Hindi) —SORA (Bengali).

Impure Pot. nit. is obtainable in most bazaars. It needs to be purified by boiling in water, straining and allowing to recrystallize. A good diuretic and diaphoretic. It has the same therapeutic action and is used for the same purpose as the drug in the English Pharmacopæia. It can easily be combined with many Indian drugs.

- R Nitre (Shora) . . . 10 grains.

  Decoction bhindi . . 2 ounces.

  For gonorrhæa.
- R Nitre (Shora) . . . 10 grains.
  Infusion Moringa root . 1 ounce.
  For dropsy.

## RASAUT—BARBERRY ROOT—DAR HALDI (Bengali).

An extract, decoction and tincture can be made from the dried bark and root. It is a bitter tonic alterative, astringent and stomachic. In large doses it is aperient.

R Rasaut root (chopped) . 6 ounces.
Water . . . 2 pints.
Boil down to 1 pint.

Dose:—2 ounces every 4 hours. A diaphoretic and bitter tonic.

Bazaar "Rasaut" is a watery extract of the root. It can be purified by dissolving in alcohol and evaporating to a pillular consistency.

Dose: -30 to 60 grains.

R Rasaut . . . . 5 grains.

Kernel of nim seed . . 2 grains.

Raisin (Manaka) . . 10 grains.

To form 3 pills. To be taken at bed time. For piles.

### RING-WORM SHRUB-DADMURDAN.

A good cure for ring-worm and parasitic skin diseases.

- R Bruised fresh leaves
  Ung. boracis or simplex equal parts.

  Rubbed into the skin for ring-worm.
- Bruised fresh leaves.

  Lemon juice, q.s. for a paste.

  Rubbed into the skin for ring-worm.

#### CASTOR OIL-ARANDI-KE-TEL.

The expressed oil of Ricinus communis is obtainable in all Indian bazaars. The dark brown oil is acrid in taste. Pale straw colour is the best. It is used for the same diseases and in the same manner as detailed in the British Pharmacopæia. In India it is especially valuable as an emulsion in infantile diarrhæa and irritative diarrhæa of adults and in dysentery.

R Castor oil . . . 1 ounce.

A purgative for adults.

R Castor oil . . . 5 drops.

Mucilage (gond) . . 5 drops.

Water . . . 1 teaspoonful.

For infantile diarrhæa.

R Castor oil . . . 1 teaspoonful.

Laudenum . . . 5 drops.

For chronic diarrhæa b.d.s. for an adult.

### SANDAL-WOOD OIL-CHANDAN TEL.

The oil distilled from wood of Santalum album. It can be got in many bazaars. Only a good oil should be used. It is a stimulant and disinfectant of the genito-urinary tract, also expectorant.

R	Sandal-wo	od (	oil		5	drops.
	Mucilage				30	drops.
	Water				1	ounce.

Dose:—1 ounce t.d.s.
For yonorrhæa and cystitis.

### SENDHA NIMAK-ROCK SALT.

Obtainable in all bazaars. A dull brownish white crystal—an impure variety of common salt, with a little sulphur and bitumen. It has a distinct laxative action and is a help to digestion.

R	Sendha nimak			10	grains.
	Kaladana	•		1	dram.
	Ginger (Soñth)	•	•	10	grains.
l la	xative powder.				

R	Sendha nimak			. )	
	Har .			.	equal parts
	Anwala (Myrob	alan	s)	. }	-2 drams.
	Pipul .		•	. )	

Dose: -10 grains twice, as a digestive.

Black salt or Kala nimak or "Bit Nun" is prepared by Indian Chemists and Hakeems from Sendha nimak and Anwala.

### SODIUM CHLORIDE—COMMON SALT— NIMAK.

Can be obtained in all bazaars. A valuable drug which is not used frequently enough in district dispensary work. It is a good emetic, a good gargle, a good dressing for wounds, a help to digestion, good for rheumatic baths, good for rectal, subcutaneous and intravenous injection. A good nasal douche in influenza.

$\mathbf{R}$	Common salt	•	•		1	d <b>r</b> am.
	Water (warm)		•		1	pint.
A go	od gargle for sor	ethr	oat.			
A go	od nasal douche	for	influe	nza.		
Good	for rectal or sub	boute	aneous	ınje	ction	ı.
				·		
$\mathbf{R}$	Sodium chlor.	•	•		<b>2</b>	drams.
	Pot. chlor.		•		6	grains.
	Calcium chlor.				4	grains.
	Water (sterile)		•		1	pint.
Roger	rs' mixture for in	ıtraı	venous	cho	lera	injection
·	•					·

R Common salt . . . 2 drams.

Hot water . . . 1 pint.

For vaginal douche.

### SHAJNA — MORINGA — HORSE-RADISH TREE.

The fresh root of Moringa pterygosperma. The root is stimulant, digestive, diuretic. Useful as a tonic in recovery from fever. The oil of the seeds is known as Ben oil and is used by perfumers.

R Moringa root (powdered) . 1 ounce.
Boiling water . . . 1 pint.

Infuse for 2 hours and strain. This is "Infusion of Moringa."

Dose: -2 ounces t.d.s.

A drivetic in dropsy. Also a good gargle in relaxed throat.

R Pot. nit. (Shora) . . . 10 grains.
Infus. moringa . . . 2 ounces.
A good divertic for calculi, dropsy and gout.

R Moringa root (powdered)
Long pepper (Pipul)
Black pepper (Kala mirich)
Rock salt (Sendha nimak)
Caraway (Jira)

equal parts—
2 drams.

Dose:—1 dram b.d.s.

For fever.

Dose:—1 ounce b.d.s. For enlarged spleen.

B Moringa oil . . . 2 ounces. Ground-nut oil . . 2 ounces.

For rheumatic joints.

#### SENNA-SONNAMAKKI.

Leaves of Cassia lanceolata and Cassia angustifolia. Cultivated in Southern India and obtainable in bazaars. A good laxative.

R Senna leaves (powdered) . 4 drams.
Ginger (bruised) (Soñth) . 1 dram.
Cloves (powdered) (Long) . 1 dram.
Water, boiling . . . 1 pint.

Macerate for 2 hours and strain.

Dose: -1 ounce with milk.

For chronic constipation.

R Infus. senna . . . 4 drams.
Infus. chiretta . . 1 ounce.

A tonic and a laxative.

Senna pods are also a valuable laxative. Ten pods are left soaking in cold water all night and the supernatant fluid drunk next morning.

### Official preparations-

- (1) Confect. senna.
- (2) Syrup senna.
- (3) Tinct. senna.

### SOMRAJ—VERONICA SEEDS—PURPLE FLEABANE.

The dried seeds of Veronica anthelmintica. obtainable in every bazaar. A good anthelmic.

R Somraj seed (bruised) . 1 dram.

Honey . . . . 2 drams.

Repeat again in 2 hours. Follow by castor-oil.

### SUFED DAMAR-PINEY RESIN.

Resin from the trunk of Vateria indica. A large evergreen tree in Southern India.

A fine resin, not unlike amber, which is met with in the bazaars in irregular masses. Used medicinally and also like copal for making varnishes. A good substitute for ordinary resin and a dressing for ulcers.

Ŗ	St	ıfed da	mar	•	•	•	5	oun	ces.
	K	okum		•	•		8	oun	ces.
	W	ax			•		2	oun	ces.
<b>Telt</b>	by	gentle	heat	and	stir;	spi	ead	on	lint.

Melt by gentle heat and stir; spread on lint. Good resinous dressing for ulcer.

### SULPHUR-GUNDAK (Hindi).

Bazaar sulphur is not fit for internal use, as it is not pure enough. It is suitable for external use. It is a parasiticide.

R	Sulphur (Gundak) Til oil or olive oil	or sin	Inla	1	dram.
	ointment . in every evening. scabies.		-	1	ounce.

B.	Sulphur (Gundak) Boracis (Sohaga) Catechu (Katha) Ung. simplex	•	,	qua -1 1	l parts dram. ounce.
For	parasitic or other ulce	rs.			

### SULPHATE OF IRON—KASIS—HIRI KASIS.

Obtainable in most bazaars. The green crystal are the best. A good hæmatinic and tonic.

B. Ferri sulph. (Kasis).
Aloes (Musabar).
Honey q.s.
30 grains.
18 grains.

Divide into 24 pills.

Dose: -1 pill t.d.s.

Laxative tonic pill.

- R. Ferri sulph. (Kasis). . . 10 grains.
  Spirit of wine . . . 1 ounce.
  Apply to skin for erysipelas.
  - R Ferri sulph. (Kasis) . . . 4 grains. Infus. chiretta . . . 3 ounces.

Dose:—1 ounce t.d.s. after food. For anæmia and debility.

R Ferri sulph. (Kasis) . . . 24 grains. Cinnamon powder (Dalchini) 30 grains. Black pepper (Kala mirich) 30 grains. Honey q.s.

Divide into 12 pills.

Dose:—1 pill b.d.s.

As a tonic.

	R	$\mathbf{Ferri}$	sul	ph.				6	grains	
		Wate	r					2	ounce	s.
	An	enema	in	blee	ding	piles	and	pr	olapse	of
an'	ns									

### TALMAKHAN-ASTERACANTHA.

A small annual—Hygrophila spinosa—with bright purple flowers growing near water.

The dried herb, seeds, and roots are used. They make a demulcent, diuretic, and cooling bitter tonic.

R Talmakhan . . . 1 ounce.

Boiling water . . . 1 pint.

Boil for 10 minutes and strain.

Dose: —2 ounces t.d.s. For dropsy.

B Dried leaves of talmakhan 2 ounces. Vinegar . . . 1 bottle.

Macerate for 3 days, press and strain.

Dose:  $-\frac{1}{2}$  to 1 ounce t.d.s.

A demulcent diuretic.

R Talmakhan root . . 1 ounce.
Water . . . 1 pint.

Boil for 10 minutes.

Dose:—1 ounce t.d.s.

As a diuretic.

### 115

### TAMARIND-IMLI.

The fruit of Tamarindus indica A refrigerent and laxative and antiscorbutic. Tamarind fruit (Imli) . 1 ounce. R Dates (Khurma) . . 1 ounce. Milk . . . . 1 quart. Boil and strain. A good laxative. Tamarind fruit pulp. . 1 ounce. Water . . . . 1 pint. Macerate and strain. Add Cloves (powdered) . . 1 dram. Cardamom (powdered) . 1 dram. Camphor (powdered) . 3 grains. For loss of appetite. For a cooling sherbut. For scurvy.

### 116

### TURMERIC-HALDI (Hindi).

The dried root stock of Curcuma longa.

Obtainable in all bazaars. An aromatic carminative. Useful in flatulence and dyspepsia. Used largely as a colouring agent.

$\mathbf{R}$	Turmeric		. 10	grains.
	Pipul .	•	. 10	grains.
	Kala mirch		. 5	grains.
	Ginger .		. 10	grains.
	Cardamom		. 10	grains.
A sin	ple digestive.			

R Turmeric  $(Hald_i)$  .  $\frac{1}{2}$  ounce. Hemp  $(Ganja\ leaves)$  .  $\frac{1}{2}$  ounce.

Linseed oil, q.s. to make a paste.

For relief in piles.

It is used extensively by Indian physicians for sore eyes, eczema and skin diseases, but its chief value is probably its colour.

#### 117

#### TIL OIL-SESAMUM OIL.

The expressed oil of the seeds of Sesamum indicum.

Obtainable in all bazaars. Good substitute for olive oil, for liniments, cintments and plasters.

## TURPENTINE OIL—GANDHE BARAJE-KI-TEL.

The bazaar oil of turpentine is not pure enough for internal use, but is a valuable application externally for rheumatism and as an ointment and for enemata.

R	Camphor	•			12	ounce	е.
	Oil of tur	pentine			8	ounce	es.
	Soft soap	•			1	ounc	e.
Stir	and rub up	till well	mix	ed fo	r a	linim	ent
For	rheumatism	sciatica	and	rub	bine	2 on	th

For rheumatism, sciatica and rubbing on the chest in bronchitis.

R Oil of turpentine . . 1 ounce.

Barley water . . . 1 pint.

An enema in flatulency, colic spasm and convulsions.

R Oil of turpentine . . . 1 ounce.
White damar . . . 1 dram.
Simple ointment . . 1 ounce.
For parasites, lice, etc., and indolent ulcers.

R. Oil of turpentine . . 2 drams. Sprinkled on hot flannel.

For stupe in colic, tympanites, cholera and dysentery.

#### 119

## VINEGAR-SIRKA.

Can be bought in most bazaars. It is useful as a cooling agent.

R	Vinegar	•	•	•	•	1	ounce.
	Water	•		•		1	ounces.
For	sponging	the	body	in feve	rs.		

B	Vinegar	}
	Methylated spirit	equal parts-
	Water	l ounce.

For application to bruises, headache, scorpionbites, wasp-bites, pruritus.

## CHAPTER III.

#### USEFUL PRESCRIPTIONS.

## A Bazaar Medical Pharmacopaia.

#### Abortion.-

## Chief Drugs for Dispensary use, which should be stocked in wide-mouthed 4-oz. bottles.

For dispensary work, the following stock of bazaar drugs should always be kept in wide-mouthed bottles for the making of stock powders, pills, liniments, aquæ, and any prescription which comes in:—

Ajowan seeds.

Alum.

Ammon. chlor.

Anwala. Asafotida.

Atis.

Babul gum.
Bonduc-nut.
Borax

Camphor. Capsicum.

Caraway seeds.

Catechu.

Chuna (Lime). Cinnamon powder.

Common salt. Copper sulph.

Copper sulph.
Coriander seed.

Cubebs.
Dill seeds.

Gall powder.

Ginger.

Har (Myrobalans).

Hindi salsa. Isaphgul.

Kakra singhi. Kaladana powder.

Kamala powder. Kurchi seeds.

Liquorice. Moringa oil.

Nutmeg. Pepper. Pipul.

Pot. nit. Rock salt.

Sulphate of iron.

Sulphur. Sugar.

Turpentine oil.

# Stock powders, pills, aquæ, etc., for dispensary use.

The following stock powders, pills, aquæ, and liniments should be kept ready made up for issue to out-patients:—
